

## GLOW IN THE DARK ANTI-SLIP TAPE

Floorsafe Australia Pty Ltd offers glow in the dark tapes to ensure walkways, stairways and entrances and exits are illuminated well enough for you to find your way safely.

The materials used to manufacture Photoluminescent glow in the dark tapes are non-toxic, and free from any phosphorous or radioactive material. Taking very little time to charge by absorbing artificial or natural light ( approx. 2 hours ) by the use of photons, in a lights out situation emit a strong photo luminescent reaction that can illuminate stair nosing's, door surrounds, walkways, stairways, skirting boards, entrance/exit ways and anywhere else that would require strong illumination for a long duration

Photoluminescent tapes are available in 18.3M rolls x 50mm in width.

Black with luminous strip & Black/white hazardous stripe

Standard 60# grade Glow-in-the-dark tapes are available in 25mm & 50mm widths x 18.3M rolls.
